TO MARK A PAINTER'S TOMB.

THE NEGLECTED GRAVE OF GILBERT

STEPS TO BE TAKEN BY THE COUNCIL OF THE

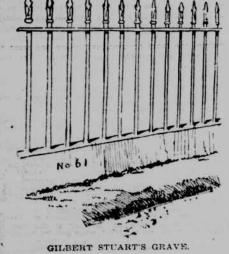

FINE ARTS FEDERATION. The recommendation of the Council of the Fine

Arts Federation of New-York at a recent meeting that steps be taken for the erection of a suitable mark over the grave of Gilbert Stuart, the dis-

GILBERT STUART Reproduced from a pen and ink drawing by himself.

tinguished American painter, will soon be carried Committee on Painting of the Federation found that Stuart's grave remained at this day save by the number of record on the

on Painting of the Fine Arts Federation, said who received the notices are the following secretary. Mr. Robinson has had published in Boston this statement: 'In the near future a National movement will be in substantial shape, the organization of which is now in progress, for the purpose euring a fitting memorial to the memory of Gilbert Stuart, and, as his name was of National significance during his life, and has become more so in later years, it is very likely that a monument will be erected to his memory in Washington, D. C.' Mr. Robinson has also had published a statement to the effect that the grave of Gilbert Stuart is marked by the number 61, incised on the upper marked by the number 61, incised on the upper surface of the iron fence curbstone which separates the old Central Burying Ground from the Boylston-st, walk in Boston Common, and that this number has stood as the only memorial of Gilbert Stuart eince his death in 1828. It also appears, according to this statement, that, while Stuart died neglected and poor at the age of seventy-two, he did not lack friends, for the 'Death and Interment Records of Boston' for that year, show that Lemuel Clark, Abligh French and Benjamin Howland, who built the tomb in 1891, or, possibly, George Howland and Nathan Prince, heirs of the three former owners, allowed the remains of Stuart to be placed in their yau!t.

allowed the remains of Stuart to be placed in their vault.

"These data are given by Mr. Robinson, and we shall await further information from him before deciding on our course. As individuals, we shall not refuse our aid to the larger scheme. In the mean time we feel it our duty to carry out the desire of the Fine Arts Federation. I have already received several offers of contributions. If we find the Boston Common Council do not object to a certain mark of dignity over Gibert Stuart's grave, a bust surmounting a small pedestal, for instance, that would be our desire. If there is any ordinance against that, a bronze tablet, set in the stonework of the iron fence, would be adopted."

Contributions may be sent to Mr. Beckwith, at his studio in the Sherwood Building, No. 58 West Fifty-seventh-st.

NOT DROWNED AFTER ALL.

THE PARTY OF THREE THOUGHT TO HAVE BEEN LOST IN THE UPPER BAY TURN UP ALL RIGHT.

two men and a woman who left Swinburne Island in a rowboat on Saturday in the fog. and who, it was feared, had been run down or swept out to sea, have been accounted for. The party. consisting of Louis Von Meers, a butler, and his wife Mary, a cook, both in the employ of Superin-tendent Arnold, of Swinburne Island, and a boatman named John M. Ferguson, left the island about Soon after leaving it Ferguson lost his bearings in the fog and rowed around all the afternoon without knowing where he was and in momentary

fear of being run down by incoming or outgoing vessels.

When the fog finally lifted late in the afternoon Ferguson discovered that he had been rowing around in a circle. The nearest land was Coney Island Point, and he made for that, and the party came to this city. Von Meers and his wife have left the service of Superintendent Arnold and are now at No. 315 West Twenty-sixth-st. None of the three suffered any ill effects from their protracted and disagreeable voyage.

SUSPENSION OF JESSE HOYT.

HIS NAME NOW POSTED ON THE PRODUCE

Jesse Hoyt was posted on the Produce Exchange yesterday for failure to settle a transaction with E. B. Cuthbert & Co., involving about \$2,000. It was sald he had a habit of forgetting his trades. He was suspended from the Exchange January 2 for non-payment of gratuity fund assessments. Mr. Hoyt is a wealthy man. He lives at No. 25 West Seventy-third-st. He is a son of Jesse Hoyt, who was famous as a grain operator, and left a fortune of several million dollars, over which there was considerable litigation.

THE REV. JOHN W. TRIMBLE SEIZED WITH

APOPLENY ON AN ELEVATED TRAIN. The Rev. John W. Trimble, a Protestant Episcopal gyman, died suddenly in the uptown station of the Sixth-ave, elevated railroad, at Twenty-third-st. ortly before 6 o'clock last evening. Mr. Trimble lived at No. 38 East Tenth-st., and was a supply clergyman for the diocese of New-York. He had his office at the See House, No. 28 Lafayette Place. his office at the See House. No. 25 Latayette Place. At 5 o'clock vesterday be was apparently in perfect health. He left his office in company with the Rev. Ralph H. Baldwin, who is hishop Potter's chaplain, to dine with him at his home. No. 38 West Eighty-seventh-st. They boarded an uptown train at Sixth-ave, and Eighthest. Shortly before reaching ill, and suddenly became unconscious. He was carried into the waiting-room, where he died before the ambulance of the New-York Hospital, which had been summored, could arrive. The dead man's been summoned, could arrive. The dead man s was flushed, and it was evident that death was

due to apoplexy.

Mr. Trimble was about forty-five years old. He was born in this city, and was educated at Kenyon College, Gambler, Ohlo. He was ordained soon after graduating. His last charge was at Tuckahoe, N. Y. He had been in New-York for the last six years. Mr. Trimble was unmarried, and leaves a sister and two brothers, all of this city.

HOW INSPECTORS FLOURISHED.

PARTMENT-TWO VIEWS REGARD-ING A LARGE HOTEL

nmissioners of Accounts yesterday tinued their investigation of the Buildings Department under Tammany rule, and heard a number of witnesses, who testified that they had paid small bribes to inspectors of buildings. H. H. Tyson, a butcher at Fifth-ave, and Forty-fourth-st., had paid \$10 for the privilege of erecting a stand in front of his shop at the time of the centennial parade. A builder declared that he had "loaned" \$10 to an inspector, and had been astonished when the inspector returned the money. An architect declared that his usual fee to an inspector who was not trouble Albert and Frederick Zucker testified that the

southwest corner of the new Hotel Majestic, at Seventy-first-st, and Central Park West, had been built on a foundation of mark, and had settled several inches, and that the iron girders in the builting were not as strong as the law requires. Albert Zucker is an architect, and Frederick Zucker was the superintendent of construction of the hotel They were understood to declare that the building would be unsafe, and that the building inspectors had failed to do their duty.

Jacob Rothschild, the owner of the building, went on the witness stand and declared that the testimony given by the Zuckers was false. The hotel had not settled an inch since it was built, he said.

"The building is as true now as the day it was built," he said, "and I challenge the statement made here to the contrary." Mr. Rothschild explained that one of the stones on the southwest corner had become loose because it could not get a good hold in the brick wall. "That's all there is to the story," he said.

The Commissioners will continue the investigation on Thursday. built on a foundation of mark, and had settled sev

LEAVE OF ABSENCE WITHOUT PAY. EMPLOYES OF THE PARK DEPARTMENT

ORDERED TO TAKE IT. The Park Board yesterday afternoon gave the names of thirty-seven employes who had been directed to take "leave of absence without pay the cemetery where he was buried, and the In a number of cases where men have re notice to go the only official information they renowed that the body in all probability was de-ostied in the cemetery on Boston Common. the leave of absence is not specified. It is believed Carroll Beckwith, chairman of the Committee by many to mean absolute discharge. The men yesterday: "I have discovered that there is in ex-istence a society called the Stuart Fund Asso-ciation, of which Frank T. Robinson, of Boston, is ciation, of which Frank T. Robinson, of Boston, is Lewald: axemen, James McManus and Patrick McNamee; inspectors of masonry, W. J. Daly and McNamee; inspectors of masonry, W. J. Daiy and Edward J. O'Connor; inspectors of pier buildings, George Ryan and Frederick Douglass; inspectors of paving, Richard W. Humphries and Robert De Witt; teamsters, Martin Gulvin, Patrick Moriarty, Thomas Moriey and Samuel Cochrane; laborers, James Fitzpatrick, William J. Rice, Patrick Frawley, William Kennedy, Alexander Jackson, Cornelius Boyle, James Baird, John Corbett, Michael Lane, John Jayden, Patrick Kenear, Thomas Graney, Thomas Cassidy, Daniel Ryan, James Murphy, Thomas Malone, Dennis Connell, Michael McCollough, Jacob Freeman and A. F. Fournier.

The discharge of George R. Burns, superintendent of the menagerie, who had a salary of \$1,590 a year, was also announced.

WEARERS OF THE BLUE DISTURBED.

TWO REDUCTIONS TO THE BANKS AT WILLETS POINT EXCITE APPREHENSION

non-commissioned officers of the Engineer Battalion stationed at Willets Point are disturbed over the new United States Army regulation which places their tenure of office at the will of their superior officers. Under the old law charges had to be preferred and sustained before a petty offi-cer could be reduced to the ranks. Under the new regulation all the captain of a company has to to is to recommend the reduction of a man in his mand, and if the recommendation is approved by the post commandant, the removal to the ranks is accomplished. The new regulation went into effect last week,

and on Thursday two sergeants in Company C had their stripes taken from them and have since been obliged to appear in the ranks. cases the men declare they had no charges preferred against them. Sergeant Edmund Leich, one of the men reduced, is but twenty-one years old He was the youngest petty officer in the whole Army. He enlisted in 1891, and within a month after he had been assigned to the Engineer Corps he was made a high private. In a little over a year after his enlistment he was made a corporal. About a year and a half ago he became a sergeant. He had fallen in love with a waitress at the captain's house, and they were married on the atrength of the supposed permanency of the place he had attained. On Thursday the first sergeant of the company served the young man with an order reducing him to the ranks. The order was obeyed without protest. The young man says he will have to seek his discharge from the Army, as he cannot now support his wife. In his old place he drew \$34 a month, but henceforth will receive but \$47. He says he likes Army sife, and was well pleased with his success, but as he now has a wife and child to support he must leave.

Sergeant John Cavenaugh, the other man reduced to the ranks, has served twenty-six years in the Army, and has an unsmirched record as a soldier. In four years he would have retired under a pension of \$42 at month. Unless he regains his sergeancy he will have to retire on \$24. He has a large family to support, and the reduction, he says, is a particular hardship, as he has spent the best years of his life in blue only to have what he sought taken from him at the last moment.

The officers at the fort positively decline to discuss the application of the new regulation in any way. he cannot now support his wife. In his old

FANNIE MILLS'S BLOOD-STAINED HISTORY Sacramento, Cal., Feb. 3.-California to-day contributed a tragic chapter to the eventful history of Miss Fannie Mills, who recently died in New-Orleans, leaving a large fortune. C. C. Brown, a brother of the deceased woman, who went from this city to New-Orleans a few days ago to claim his ants who will contend with him for it. In response to his request for information concerning his sister's career in California, the files of "The Sacremento Union" have been ransacked. It has been found that on the night of December 20, 1852, Fan-nie Mills, or Fannie Smith, as she was then known, nie Mills, or Fannie Smith, as she was then known, shot and killed a stage driver, named Albert Putnam, in a dive kept by her on Second-st. A crown of Putnam's friends surrounded the resort, and threatened to lynch the murderess. The city marking and his deputles had a desperate battle with the mob, and finally succeeded in piacing their prisoner on board of a barge on the river, where she was secreted for some time until the excitement substitute. She had a preliminary examination, and was released on \$3,000 bail, which she forfeited and disappeared. The incident was forgotten until recalled by the news of har death a few weeks ago.

[BY TELEGRAPH TO THE TRIBUNE.] New-Haven. Feb. 3.—Photography by means of the cathode rays is becoming an absorbing passion among the Yale instructors and students in optics ments last week have just been supplemented by a remarkably successful series by Henry A. Bumstead, one of the instructors in the Sheffield Scientific School He laid his sensitive photographic ject to be experimented with on top of the box, and suspended his Crookes tube above them both He then turned on the electric current, which

generated the newly discovered rays in the tube,

which, in turn, threw them upon the objects be-

leather pockstbook, containing several coins. He thus photographed the coins, the rays going com-pletely through the leather, the resistance of which was triffing compared with what it would have offered to light. He also photographed in the same way a pair of eyeglasses in their case. result showed that the glasses were photographed, while the case was scarcely visible. A lead penell was experimented on, and the result TESTIMONY ABOUT THE OLD BUILDINGS DE- was an excellent picture of the lead, with the wooden portion dimity outlined. A couple of Eng-

NEW PHOTOGRAPHY AT YALE, IN THE CYCLING WORLD.

A CYCLE SHOW TO BE HELD IN BROOK-LYN NEXT MONTH.

THE BRAKE BILL TO HAVE A HEARING ON MON-YORKVILLE, ORGANIZE NOTES AND

While there is little chance of cessation of cycle shows the chances are that the shows of the future will be run on entirely different plans than those of the past. The exhibition of the future may be more of a social function than was the case with the recent shows in Chicago and in this city. The exrecent shows in Chicago and in this city. The exhibitions this year were remarkably successful from every standpoint, and the character of the people present would have compared favorably with the attendance at any other exhibitions ever held. Still some of the thinking men of the cycling world seem to believe that there was too much business about the shows and that in the future there should be more of a social side to the exhibitions and less business. Howard E. Raymond voiced these sentiments the other day, and he said he thought that there would be a change before another big show was to be held. His idea is to have the shows held later in the season. This will enable the manufacturers and dealers to have their business for the year fixed up and further barriering will be dispensed with in favor of sociability. In other worls the big exhibitions next year may be conducted more after the plan of the Horse Show. cords the big exhibit ons next year at

The first effort in this direction will be made in

PHOTOGRAPH OF THE BONES OF A LIVING HUMAN HAND.

Perhaps the most successful imitator of Professor Bontgen in London, in photographing with Perhaps the most successful initiator of Tro esser Rollgeri in Landon, in photographing with the so-called X ray, is A. A. Campbell Swinton. One of the pletures which he obtained by this process is reproduced herewith, and is copied from "Nature." This is what the photographers call a "positive," and not a negative. In the latter the bones would show while, being opaque to the newly found radiance, and the fiesh would appear dark, since it is semi-transparent. But when a print is made from the negative, the bones should appear dark and the flesh lighter. In this respect the picture herewith exhibited gives a more accurate ide a to the popular mind than those hitherto printed in the United States. It must be remembered that these photographs are produced by shadows of different densities. Mr. Swinton exposed his plate for this picture (wenty minutes

Vienna dispatch to The London Standard. vienna dispatch to the London Standard.

In the present high state of operative skill and surgical science it is already possible pretty accurately to fix the position of foreign substances in he living human body, especially bullets splinters of metal, and so forth, and the assistance obtained by Röntgen's photographs will only facilitate operations, without effecting a revolution in surgery or a medical treatment.

the living human horly, especially bullets splinters of metal, and so forth, and the assistance obtained by Roniger's photographs will only hellitate operations, without effecting a revolution in surgery or in medical treatment.

In the metallurgic arts, on the other hand, we seem to be on the eve of a very important advance. Hitherto it has not been possible, without a very complicated process, to test the antiformity of the structure of metalwork, as, for instance, in the case of gun barrels, from rails, railway wheels, and so on, or to distinguish at sight the different varieties of from and steel. All this, it is anticipated, will be shortly achievable simply by help of the new photography. It is no exaggeration to say that this would mean a complete revolution in many branches of metallic industry, especially in the manufacture of arms, and such a revolution, it is confidently expected, will result from the experiments that have already been commenced in Vienna.

Exact reproductions, for instance, have been obtained of inscriptions or relief drawings on signet rings and metallic surfaces, and in such reproductions every one will agree that the thickness of the object cannot fall to have some influence upon the relative clearness of the photograph To the great astonishment of the experimenters, however, it has been found that the metallic objects exposed to the metals, such as fractures, cavities, and so forth. This quality, which theorists recognize as being due to the great sensitiveness of the rays to variations in thickness, has attracted the attention of practical men, who are beginning to utilize it for metallurghe tests—tests which could hitherto only be carried out either by chemical reactions of practical applications of the rays to he process or other that required great experience, methods which all took up a considerable amount of time.

It is now hoped that it will soon be possible to look, so to speak, into the very insides of metals. For all alloys or composite metals—and most of those will,

MRS. CRICHTON GETS HER DIVORCE. Bettina Girard, the actress, figures again as co-respondent in a divorce action in which the report of Edward L. Patterson, the referce, was filed yesterday in the Supreme Court. The plaintiff in the action is Emily Augusta

Crichton, who sues her husband, William, for absolute divorce. The plaintiff is the daughter of Warden Pillsbury, of Blackwell's Island, with whom she is living. The husband is said to be connected with the United States Legation in Brazil. The couple were married at the Windsor Hotel or June 8, 1888, and separated three years

ago.

The referee finds in favor of Mrs. Crichton and recommends that the custody of her six-year-old daughter be given to her. There was no request for allmony, but the plaintiff is awarded the costs of the action.

HE COULD NOT SAVE HIS BOYS

Providence, Feb. 3.-Two boys, Denison and Fred Spencer, one five and the other eight years old. drowned yesterday forenoon while at play on the ice back of their father's house. They broke through the ice with their sied. Their father heard their cries, but before he could reach them life was ex-tinct. In rescuing their bodies from the water, Mr. Spencer became chilled, and but for the time, aid of his brother he, too, might have been drowned.

lish walnuts, which had never been opened, were exposed and a special effort will be made to induce the exposed and a special view of the kernels was obtained. All these exposures jasted about an onur. The experiments were carried on in open laylight, the plates, of course, being kept from the Cycle Club of Repoklen at the Cycle Club daylight, the plates, of course, being kept from the sun is an ordinary holder. Probably the most intresting of Mr. Hamstead's experiments were those with animals. For this purpose he used a fish, a mouse and a frog. After the sual exposure the backleone of the fish was easily distinguishable, and another opaque substance, evidently the swimming bladder. The frog picture displays a portion of the skeleton with more or less vividness, the plainest parts being the ge hone. The most listinct part of the mouse keleton was the skull, which could be traced with title difficulty. mittee of the Board of Aldermen would give a public cearing on the bleycle brake bill next Monday. The hearing will take place at 2.20 p. m. in room 16. City Hall. As the National Assembly will meet at Baltimore on that day none of the Board of Officers of the League of American Wheelman. of Officers of the League of American Wheelmen of this city will be able to be present. Besides the officials many other prominent cyclists will go to Maryland to attend the annual meeting. Some wheelmen think that action on the brake bill ought to be held this week, or postponed until after the National Assembly.

A number of enthusiastic bicyclists recently held a meeting at 1,532 Third-ave, and organized the Amphlon Wheelmen of Yorkville, with thirty charter members. They elected the following officers for the ensuing year: President, T. J. McBride; vicepresident, F. Pink, recording secretary, H. Guerth, financial secretary, J. Black, treasurer, J. H. Mend, sergeant-at-arms, A. Schmitt, captain, A. L. Brudi, first lieutemant, A. Fuenkenstein; second lieutemant, G. Meagher. Board of Directors—M. I. Good, F. Kupka, M. Rothholz, A. L. Brudi and F. Pink.

At the last regular meeting of the Bushwick Wheelmen the following resolutions were adopted: Whereas, Wheelmen increase in numbers so rapidly as to warrant more legislation in their behalf looking to improvements of public streets and highways, estectally main thoroughfares, and, Wherens, Rushwick-ave, from Myrtle-ave, to Jamaica-ave, and Pennsyivania-ave to Glemmore-ave, heing the main outlets to queens County, are in a poorly pawed condition, especially that part of linshwick-ave, which is not at all paved, and absolutely unrideable; and, Whereas The property owners will not be the distribution of the property owners will not be and absolutely unrideable; and,

matea-ave, which is not at all paved, and absolutely unrideable; and.

Whereas. The property-owners will not bear the expense of having said thoroughfares repaved; therefore be it.

Resolved. That we, the Bushwick Wheelmen, hereby petition the Board of Aldermen to do all in their power to have a strip of asphalt, six feet in width, laid on either side of Bushwick-ave, from Myrtle-ave, to the cemetery, and to properly pave Bushwick-ave, from Evergreens Cemetery to Jamaica-ave, from Jamaica-ave, which is

BROWN'S FOOTBALL COACH. New-Haven, Feb. 3 .- William H. S. Moyle, of this

city, has signed as coach for the Brown University football eleven next season. Mr. Moyle has coached two Brown University teams. The manager of the Brown team is John D. Rockefeller, ir., son of the president of the Standard Oil Company.

MR. COUDERT WAS NOT ILL.

A REPORT THAT HE WAS DELAYED THE RAPID TRANSIT INQUIRY.

A false report that Frederic R. Coudert was too ill to attend the Rapid Transit hearing at No. 256 Broadway was sent by telephone to that place yesterday morning, and it caused a postponement of the hearing. All of the witnesses had disappeared when Mr. Condert, the chalrman of the Supreme Court Commission to take testimony about the underground railroad, suddenly appeared, and contradicted the report that he was ill. Messages were sent in all directions, and the Commission was able to go on with the inquiry in the afternoon. Chief Engineer Parsons, in reply to Mr. Zabriskie, counsel for the protesting Broadway property-own ers, detailed for the twentieth time the substance of his plans and estimates which had been submitted to the Board of Experts. In reply to E. M.

mitted to the Board of Experts. In reply to E. M. Shepard, counsel for the Rapid Transit Board, Mr. Parsons went into an exhaustive explanation as to the variations in cost of masonry and brickwork and the cost of steel and iron contained in his original estimate, as compared with that presented at the present inquiry.

The next witness was Theodore Cooper, the engineering expert, who said he had examined Mr. Parsons's estimate as to the cost of the proposed underground railroad, and thought the railroad could be constructed at his figures. As to the question of p.pes and conduits, Mr. Cooper said he did not desire to express an opinion, as the matter was not in his line, but he fully agreed with Mr. Parsons as to the practicability of the grades represented in the plans. The witness said he saw no reason why a high rate of speed could not be maintained.

An adjournment was taken until to-day at 2 n. m., when the first witness will be Alphonse Fteley, chief engineer of the Aqueduct Commission.

CONVICTED OF ROBBING MRS. PHIPPS Nathan Herzberg, who is accused of being one of the men who attacked and robbed Mrs. Mildred A. Phipps, in the hallway of her home, No. 515 East Seventy-second-st., on January 18, was placed on trial yesterday in Part III of the General Sessions. Mrs. Phipps identified Herzberg as her assailant and described the assault, the details of which and described the assault, the details of which have already been published. Mrs. Anderson, janitress of the flathouse in which Mrs. Phipps lives, testified that she had seen the prisoner about the hallway earlier in the day. Several other witnesses testified that they saw the accused man in that neighborhood on the day of the assault begging from the tenants.

The case was given to the jury, which, after deliberating for two hours, returned a verdict of guilty of robbery in the third degree. Judge Newburger sentenced Herzberg to the Elmira Reformatory.

THE AWARD TO YALE WITHHELD. New-Haven, Feb. 3.-It is stated here that State

Treasurer Hodge has declined for the present to pay Yale the money awarded by the terms of the Storrs arbitration decision, amounting to \$154.0% Mr. Hodge says that the terms of the act passed by the Legislature has year, authorizing the appointment of Lie commission, were ambiguous in nature, and he thinks it his duty to refer the entire matter to the next Legislature before paying the amount to Yale. The Yale corporation will make another effort to collect the money. "I AM GLAD I AM ALIVE."

It Rings and Throbs from the Heart and How Even a Great Scientist May be Mistaken, This Will Possibly Throw Some Light on the

Dr. William James writing on the question, "Is life worth living," in the Journal of Ethics,

says:-"Suffering and hardship as a rule, do not abate the love of life. The sovereign source of melan-

choly is repletion." This is not true.

Suffering does abate the love of life, and the sovereign source of melancholy is nervous weak-

How many thousands of people there are today who can sadly bear out these facts! How many of earth's scattered millions can truly say that life is worth living! How many are there in whom the touch of melancholy is not the outgrowth of nerve or physical weakness! Did you ever greet a man whose whole-souled

smile, ruddy, beaming face and warm, pulsing hand-grasp thrilled you as he cried joyously in answer to your salutation: "I feel first rate; I am glad I am alive!"

fill health is the breeder of weakness, melancholy and despair. Good health means love of life and enjoyment of its every pleasure. If you are a sufferer, if you are not in perfect health, if you do not thoroughly enjoy life, the first thing for you to do is to recover your health by using

HARLOW M. SMITH,

that great strengthener and restorative, Dr. Greene's Nervura blood and nerve remedy. By its use you can be put in sound condition, with strong nerves, vigorous muscles, restored energies, and learn again that to the person in health life is indeed worth living.

Harlow M. Smith, of Montpelier, Vt., says:—"I had been alling for a long time. I was unable to work at this time, suffering pain all the time. I was extremely nervous and came very near nervous prostration. I was unable to eat without great suffering, my stomach filled with gas, which I was unable to get rid of, causing my stomach to bloat so that I could not endure my clothes around me without loosening them.

"At this time I began taking Dr. Greene's Nervura blood and nerve remedy, as both my brother and sister had used it with the best results, and in two weeks' time I was able to go to work and have continued the use of the Nervura until I was quite relieved of my trouble, and I have had no return of it.

"I recommend Dr. Greene's Nervura blood and nerve remedy to all people afflicted."

Do not fail to use Dr. Greene's Nervura blood and nerve remedy and get back your health. This is not a so-called patent medicine, but the prescription of the most successful specialist in nervous and chronic diseases, Dr. Greene, of 35 West 14th St., New York City, who can be consulted without charge, personally or by letter.

COLUMBIA A UNIVERSITY.

THE SCHOOL OF ARTS TO BE THE COL-LEGE.

THE NEW SITE TO BE DEDICATED ON MAY 2-EX-

MAYOR HEWITT TO DELIVER THE ORATION. The trustees of Columbia College held their monthly meeting yesterday in Hamilton Hall. The following trustees were present: W. C. Schermerhorn, the Rev. Dr. Morgan Dix, W. G. Lathrop, S. P. Nash, Joseph W. Harper, Dr. George G. Wheelock, Charles A. Silliman, F. Auday by Woodard | gustus Schermerhorn, Gerard Beekman, Edward Mitchell, Seth Low, George L. Rives, Lenox Smith, John Crosby Brown, Dr. W. H. Draper, John B. Pine. Cornelius Vanderbilt, H. H. Cam-

> mann, and W. G. Lathrop. The following resolution was unanimously

Resolved, That in all official publications hereafter issued by or under authority of the trustees,
all the departments of instruction and research maintained and managed by this corporation may, for
convenience, be designated collectively as "Columbia University," and the School of Arts, as the
same is now known and described, may hereafter
be designated as "Columbia College" or "The College."

The public dedication of the new Columbia site was formally passed on. It was voted that the ceremony should take place on May 2. Accommodations will be made for 3,000 people besides the alumni and undergraduates. Ex-Mayor Hew-

itt, of the class of '42, has been requested to de-liver the oration, and Lafayette Post of the G. A. R. will present a flag to the college.

The committee on the building and grounds submitted a part of its plans for the university building which is to be erected on the new site. The plans include the engine and botler rooms and a large gymnasium, the dimensions of which are to be \$2x170 and its height 35 feet. It will be are to be \$2x17e and its height 35 feet. It will be lighted on the north, east and west, and will face toward the northern portion of the grounds, where the space will be covered with trees. A large running-track will be provided. The gymnasium will be provided with a large swimming tank, shower baths and dressing-rooms. These plans were formally accepted by the trustees.

John F. Plummer was appointed assistant secretary of the university, and Dr. Walton Martin was appointed assistant demonstrator in anatomy. The new curriculum for the School of Arts, recently adopted by the faculty, was presented. It will not be acted upon, however, until the next meeting.

CASHIER BARNARD'S OPERATIONS.

THE BROKEN PORT STANWIX BANK HELD UNSAL-ABLE PAPER FOR A BALTIMORE CONCERN.

Rome, N. Y., Feb. 3.—It has been learned that the Fort Stanwix National Bank has been carrying paper to the amount of \$60,000 or more for the J. Winslow Packing Company, of Baltimore, upon which it has been unable to realize, and that the note which Cashier Barnard left exonerating the bookkeeper, Silienbeck, and taking all the blame on himself refers to this. How the packing company got into the bank to such an extent is not known. There is also said to be in the bank paper of the late firm of R. M. Bingham & Co., representing \$35,000, on which all but about \$10,000 has been paid, but nothing credited. There are also notes of the late D. B. Prince to the amount of \$10,000 which cannot be realized upon. Mr. Barnard was the assignee of the estate of the late George Clarke, the great land owner, and there is more or less of this paper in the bank. All these things, together with miscellaneous papers which are worthless, or nearly so, will, it is believed, wipe out the entire surplus and undivided profits, amounting to \$170,000. The stockholders of the bank are quite positive that the institution will be able to pay depositors dollar for dollar.

Bank Examiner Van Vranken is still at work on the books and declines to make any statement whatever, even to say whether or not he has sent to the Controller a dispatch branding Cashier Barnard as a defaulter.

The Home Savings Bank to-day moved from the Fort Stanwix Bank Building into the office of James II. Scarles, next door. President Utley, of the Fort Stanwix Bank, who went to California last week, is now on h.s way home in response to a telegram from the bank's officers. known. There is also said to be in the bank paper

ILLNESS OF W. Q. JUDGE.

Fort Wayne, Ind., Feb. 3.-W Q. Judge, president here for some time under the care of Dr. A. F. Buchman, a specialist in bronchial diseases and a prominent Theosophist, left here for his home in the East last night, accompanied by his wife. Mr. Judge is in a serious condition, owing to a bronchial trouble of long standing.

EVERYONE IS AWARE

of the high merit of Flint's Fine Furniture, now a ow manufacturing price, to make room for new goods
